

**Western University**  
**Faculty of Engineering**  
**Department of Electrical and Computer Engineering**

**ECE 3331B: Introduction to Signal Processing**

**Course Outline 2023-24**  
**January 8 to April 8, 2024**

**Description:** This course covers the fundamental theories in digital signal processing (DSP). Basic sequences encountered in DSP are presented, and the fundamentals of sampling and system responses are introduced. The differences between the processing of periodic and aperiodic signals are discussed and time domain methods such as convolution of two signals are developed. Frequency domain methods, such as the Discrete Fourier Transform and the Fast Fourier Transform are presented. The z-Transform is introduced as a tool for discrete time signal processing.

**Academic Calendar Copy:** Introduction to discrete-time signals and sampled data, linear time invariant (LTI) systems, frequency response, discrete Fourier transforms, convolution, spectrum analysis, Z-transforms, non-recursive digital filters.

**Prerequisite(s):** [ECE 2233A/B](#) or [MSE 2233A/B](#).

**Antirequisite:** N/A

**Co-requisite:** N/A

Extra Information

**Extra Information:** 3 lecture hours, 1 laboratory hour.

**Course Weight:** 0.50

**Contact Hours:** 3 lecture hours/week, 3 laboratory hours/week (6 weeks per term), 0.5 course.

Unless you have either the requisites for this course or written special permission from the Dean to enroll in it, you will be removed from this course, and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees if you are dropped from a course for failing to have the necessary prerequisites.

**CEAB Academic Units:** Engineering Science 80%, Engineering Design 20%.

**Recommended References:**

1. “Digital Signal Processing; Principles, Algorithms and Applications,” 4<sup>th</sup> Edition, by John G. Proakis and Dimitris G. Manolakis, Pearson Prentice Hall, 2007, or 5<sup>th</sup> edition, 2021.
2. “Applied Digital Signal Processing,” by Dimitris G. Manolakis and Vinay K. Ingle, Cambridge University Press, 2011.

**General Learning Objectives (CEAB Graduate Attributes)**

Knowledge Base	D	Use of Engineering Tools	D	Impact on Society and the Environment	
Problem Analysis	D	Individual and Teamwork		Ethics and Equity	
Investigation		Communication Skills	A	Economics and Project Management	
Design	I	Professionalism		Life-Long Learning	

**Notation. I** – The instructor will introduce the topic at the level required. It is not necessary for the student to have seen the material before. **D** – There may be a reminder or review, but the student is expected to have seen and been tested on the material before taking the course. **A** – It is expected that the student can apply the knowledge without prompting (e.g. no review).

Course Topics and Specific Learning Outcomes	CEAB Graduate Attributes Indicators
<p>1. Introduction</p> <ul style="list-style-type: none"> <li>• Signals, systems, and signal processing</li> <li>• Classification of signals</li> <li>• The concept of frequency in continuous-time and discrete-time signals</li> <li>• Analog-to-digital (A/D) and digital-to-analog (D/A) conversions</li> </ul> <p>At the end of this section, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Identify the basic elements of a digital signal processing system.</li> <li>b. Describe the basic properties of discrete-time sinusoidal signals.</li> <li>c. Determine the characteristics of a discrete-time signal obtained by sampling of continuous-time signal.</li> </ol> <p>2. Discrete-time signals and systems</p> <ul style="list-style-type: none"> <li>• Discrete-time signals</li> <li>• Discrete-time systems</li> <li>• Linear time invariant (LTI) systems</li> <li>• Discrete-time systems using difference equations.</li> <li>• Implementation of discrete-time systems</li> </ul>	<p>KB 3, KB 4</p>

<p>At the end of this section, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Characterise systems: linear vs nonlinear, causal vs non-causal, time-invariant and time-varying etc.</li> <li>b. Calculate response of discrete-time system to an arbitrary input using convolution</li> <li>c. Understand the memory requirement for implementation of discrete-time system.</li> </ol> <p>3. The z-transform and its application to analysis of LTI systems</p> <ul style="list-style-type: none"> <li>• The z-transform</li> <li>• Properties of the z-transform</li> <li>• Rational z-transforms</li> <li>• Inversion of z-transforms</li> <li>• Analysis of z-transforms in z-domain</li> <li>• The one-sided z-transform</li> </ul> <p>At the end of the section, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Convert time-domain signals into z-domain using z-transform.</li> <li>b. Compute zero-state response of an LTI system using z-transform methods.</li> <li>c. Describe relation between pole location and time-domain behavior of an LTI system.</li> </ol> <p>4. Frequency-domain analysis of signals</p> <ul style="list-style-type: none"> <li>• Frequency-domain analysis of continuous-time signals</li> <li>• Frequency-domain analysis of discrete-time signals</li> <li>• Properties of Fourier transform of discrete-time signals.</li> </ul> <p>At the end of this section, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Explain differences between Fourier representation of various types of signals.</li> <li>b. Calculate the Fourier transform of discrete-time signals.</li> </ol> <p>5. Frequency-domain analysis of LTI systems</p> <ul style="list-style-type: none"> <li>• Frequency-domain characteristics of LTI systems</li> <li>• Frequency response of LTI systems</li> <li>• LTI systems as frequency-selective filters</li> </ul> <p>At the end of this section, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Convert time-domain signals into z-domain using z-transform.</li> <li>b. Compute zero-state response of an LTI system using z-transform methods.</li> <li>c. Describe relationship between pole location and time-domain behavior of an LTI systems.</li> <li>d. Design simple digital filters</li> </ol>	<p>KB 4</p> <p>KB 3, KB 4, ET 3</p> <p>KB 4</p> <p>KB 4, ET 3</p> <p>KB 4, ET 3</p> <p>KB 4</p> <p>KB 3</p> <p>KB 4, ET 3</p> <p>KB 4</p> <p>KB 4, ET 3</p> <p>KB 4</p> <p>KB 4, ET 3</p> <p>KB 4</p> <p>PA 2, PA 3, D1-D3</p>

<p>6. The discrete Fourier Transform</p> <ul style="list-style-type: none"> <li>• Frequency-domain sampling: The discrete Fourier transform (DFT)</li> <li>• Properties of the DFT</li> <li>• The fast Fourier transform (FFT)</li> </ul> <p>At the end of this section, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Explain the relationship between Fourier transform and DFT.</li> <li>b. Compute the response of an FIR filter to a given input signal using DFT.</li> <li>c. Explain the principles behind the FFT algorithm.</li> </ol> <p>7. Laboratory Exercises and Laboratory Project</p>	<p>KB 3 KB 4 ET 3</p>
---	-------------------------------

## Evaluation

Course Component	Weight
Laboratory Exercises	25%
Midterm Test	25%
Final Examination	50%

To obtain a passing grade in the course, 50 % or more on the final exam and an overall course grade of 50% or more must be achieved. A grade of < 50% on the final exam will result in a final course grade of 48% or less.

**Homework exercises and assignments:** Several homework exercises and assignments will be posted from time to time on the course website. These homework exercises and assignments will not be marked; you are required to solve them to strengthen your understanding of the concepts taught in the course. Efforts will be made to post solutions to these on the course website.

**Laboratory exercises:** There are four MATLAB-based laboratory exercises and one laboratory tutorial in this course. Students are required to familiarize themselves with the MATLAB software. The laboratory manuals will be posted on the course website. Students will be required to submit their laboratory reports online through Assignments Portal on course website on due dates. Late submission are not accepted.

**Midterm Test:** The midterm will take place during the regularly scheduled lecture hours. Place of Exam: To be announced; Duration: 2 hours; Format: Closed book exam and written response required.

**Final Examination:** The final exam will be scheduled by the Registrar's Office during the regular Winter term examination period in April. Place of Exam: To be announced; Duration: 3 hours; Format: Closed book exam and written response required.

**Late submission policy:** All laboratory reports and the laboratory project report are due by 4.30 PM on the specified due dates. Late submissions are not allowed.

**Use of English:** In accordance with Senate and Faculty Policy, students may be penalized up to 10% of the marks on all laboratory reports and laboratory project report for improper use of English. Additionally, poorly written submissions except for the midterm and the final examinations may be returned without grading. If resubmission of the work is permitted, it may be graded with 10% penalty for poor English and/or late submission.

**Attendance policy:** All classes, laboratories, and tutorials are mandatory unless otherwise stated and the attendance will be taken. Any student who, in the opinion of the instructor, is absent too frequently from class, laboratory, or tutorial periods will be reported to the Dean (after due warning has been given). On the recommendation of the department, and with the permission of the Dean, the student will be debarred from taking the regular final examination in the course.

**Absence Due to Illness or Other Circumstances:** Students should immediately consult with the instructor or department Chair if they have any problems that could affect their performance in the course. Where appropriate, the problems should be documented (see the attached “Instructions for Students Unable to Write Tests or Examinations or Submit Assignments as Scheduled”). The student should seek advice from the instructor or department Chair regarding how best to deal with the problem. Failure to notify the instructor or department Chair immediately (or as soon as possible thereafter) will have a negative effect on any appeal.

For more information concerning medical accommodations, see the relevant section of the Academic Handbook:

[http://www.uwo.ca/univsec/pdf/academic\\_policies/appeals/accommodation\\_medical.pdf](http://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_medical.pdf)

For more information concerning accommodations for religious holidays, see the relevant section of the Academic Handbook:

[http://www.uwo.ca/univsec/pdf/academic\\_policies/appeals/accommodation\\_religious.pdf](http://www.uwo.ca/univsec/pdf/academic_policies/appeals/accommodation_religious.pdf)

**Academic Consideration for work worth less than 10% of the overall grade in the course:** A student seeking academic consideration for any work worth less than 10% of the total course grade must contact the Dean’s office and, if applicable, submit the relevant medical documentation to that office.

**Missed Midterm Examinations:** If a student misses a midterm examination, the exam will not be rescheduled. The student must follow the Instructions for Students Unable to Write Tests and provide documentation to their department within 24 hours of the missed test. The department will decide whether to allow the reweighting of the test, where reweighting means the marks normally allotted for the midterm will be added to the final exam. If no reasonable justification for missing the test can be found, then the student will receive a mark of zero for the test.

If a student is going to miss the midterm examination for religious reasons, they must inform the instructor in writing within 48 hours of the announcement of the exam date or they will be required to write the exam.

**Course Delivery with Respect to the COVID-19 Pandemic:** Although the intent is for this course to be delivered in-person, the changing COVID-19 landscape may necessitate some or all the course to be delivered online, either synchronously (i.e., at the times indicated in the timetable) or asynchronously (e.g., posted on OWL for students to view at their convenience). The grading scheme will not change. Any assessments affected will be conducted online as determined by the course instructor.

When deemed necessary, tests and examinations in this course will be conducted using a remote proctoring service. By taking this course, you are consenting to the use of this software and acknowledge that you will be required to provide personal information (including some biometric data) and the session will be recorded. Completion of this course will require you to have a reliable internet connection and a device that meets the technical requirements for this service. More information about this remote proctoring service, including technical requirements, is available on Western's Remote Proctoring website at: <https://remoteproctoring.uwo.ca>.

**Cheating and Plagiarism:** Students must write their essays and assignments in their own words. Whenever students take an idea or a passage from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. University policy states that cheating, including plagiarism, is a scholastic offence. The commission of a scholastic offence is attended by academic penalties, which might include expulsion from the program. If you are caught cheating, there will be no second warning.

All required papers may be subject to submission for textual similarity review to commercial plagiarism-detection software under license to the University for the detection of plagiarism. All papers submitted will be included as source documents on the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between the University of Western Ontario and Turnitin.com (<http://www.turnitin.com>).

Scholastic offences are taken seriously and students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence, in the relevant section of the Academic Handbook: [http://www.uwo.ca/univsec/pdf/academic\\_policies/appeals/scholastic\\_discipline\\_undergrad.pdf](http://www.uwo.ca/univsec/pdf/academic_policies/appeals/scholastic_discipline_undergrad.pdf)

**Use of Electronic Devices:** Students may use laptops, tablet computers, or smart phones only to access the course OWL site during lectures and tutorials. Use of nonprogrammable calculators only is permitted during tests and examinations. No other electronic devices may be used at any time during lectures, tutorials, or examinations.

**Policy on Repeating All Components of a Course:** Students who are required to repeat an Engineering course must repeat all components of the course. No special permissions will be granted enabling a student to retain laboratory, assignment, or test marks from previous years. Previously completed assignments and laboratories cannot be resubmitted by the student for grading in subsequent years.

**Internet and Electronic Mail:** Students are responsible for regularly checking their Western e-mail and the course web site (<https://owl.uwo.ca/portal/>) and making themselves aware of any information that is posted about the course.

**Accessibility:** Please contact the course instructor if you require material in an alternate format or if any other arrangements can make this course more accessible to you. You may also wish to contact Services for Students with Disabilities (SSD) at 519-661-2111 ext. 82147 for any specific question regarding an accommodation.

**Support Services:** Office of the Registrar, <http://www.registrar.uwo.ca/>  
Student Development Centre, <http://www.sdc.uwo.ca/>  
Engineering Undergraduate Services, <http://www.eng.uwo.ca/undergraduate/> USC  
Student Support Services, <http://westernusc.ca/services/>

Students who are in emotional/mental distress should refer to Mental Health @ Western, [http://www.health.uwo.ca/mental\\_health/](http://www.health.uwo.ca/mental_health/), for a complete list of options about how to obtain help.
