

Project Requirements

Problem Statement and Objective

Presently, the Ivey business school uses nameplates in their classes to identify students for attendance and participation purposes. They would like to develop an electronic nameplate to be used to record attendance and to facilitate class participation.

Student Display

Appearance:

The nametag will be comprised of a two-sided LCD display with a 1" bezel at the rear of the display reserved for buttons that will be implemented via software on the rear screen. Equally, the rear of the display can be comprised of touch screen.

The nametag and interconnection to the faculty member's dashboard shall be achieved using Wifi.
